

Notes:

1. Section shown is based on minimum ICPI recommendations.
2. Subbase and base thicknesses, edge restraint, and drainage details vary depending on project requirements. Final design for construction must be prepared by a licensed civil engineer or landscape architect, considering actual conditions of the proposed site and project goals.
3. Long-term performance requires routine maintenance to maintain permeability.

This drawing is for reference only. Determination of the suitability and/or manner of use of any details contained in this document is the sole responsibility of the design engineer of record. Final project designs, including all construction details, shall be prepared by a licensed professional engineer using the actual conditions of the proposed site.
