**BLEND MULTIPLE PALLETs**
- In order to achieve the best possible color blend, utilize material from multiple pallets simultaneously (when applicable).

**PROPER SETBACK**
- To achieve proper setback in a retaining wall (4°), place each row of block ¼” back from the previous row. (see graphic on reverse side of this sheet)

**AVOID VERTICAL SEAMS**
- Lay blocks in a random order to avoid the appearance of vertical seams.

**CONVEX RADIUS WALLS**
- Convex curved walls can be made with a minimum radius of 14 ft.

**GLUE FOR STRENGTH**
